EDUCATION

University of Washington Seattle, WA
Bachelor of Science in Informatics (Software Development Track) September 2023 - June 2027
Cumulative GPA: 3.91 *(2023-2025 Annual Dean's List)*
Relevant Coursework: Data Structures and Algorithms, Client-Side Development, Databases and Data Modeling, Cooperative Software Development, Product and Information Systems Management

WORK EXPERIENCE

Software Developer Intern | *Sensors, Energy, and Automation Laboratory (Seattle, WA)* January 2026 - Present

- Rebuilt SEAL's legacy Google Sheets–based workflow into a secure lab-wide web application with improved data architecture and user interface design.
- Implemented Google OAuth authentication, PostgreSQL database-backed data management, and AI-assisted tooling to streamline research workflows and reduce manual data handling

Associate Software Engineer | *POP (Seattle, WA)* June 2025 - Present

- Developed a full-stack MCP server and AI agent wrapper integrating project management, tracking, and communication tools into a unified system with persistent context awareness.
- Built backend APIs and tool interfaces enabling AI agents to retrieve data and trigger workflows through an MCP-based architecture.

AI Researcher | *July AI (San Francisco, CA; Remote)* April 2025 - August 2025

- Performed security testing and red teaming on large language models to identify prompt injection, tool misuse, and safety vulnerabilities.
- Developed prototype AI agents and contributed to MCP-based architectures for secure tool-integrated LLM deployments.

SELECTED PROJECTS

Husky Maps | *Data Structures & Algorithms, Java, Docker* December 2024

- Developed HuskyMaps, a web app that helps users find businesses in Seattle and the shortest paths between them. The app synthesizes data structures by leveraging shortest path algorithms, priority queues, deques, and autocomplete.

Congress.AI | *React, JavaScript, HTML/CSS, MongoDB* October 2024

- Developed Congress.AI (a web application leveraging AWS Amplify, MongoDB, and AWS Bedrock) as part of a four person team enabling smooth user interaction with bill summaries and voting records for each United States representative.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Typescript, C#, SQL, HTML/CSS, R

Frameworks: React, Next.js, Node.js, Svelte, SvelteKit, Express

Databases: MongoDB, Firebase, Postgres, MSSQL

Tools & Platforms: Git, Docker, AWS, Azure, Unity, Godot, Figma
